EDUCATION

BCA (2025)	**64.5%**
XII (2021)	**62%**

TOOLS & TYPING

APIs Testing
Hoppscotch

Version Control
Git & GitHub

Touch Typing
55-60 WPM

HOBBIES

- LeetCode Challenges
- Sudoku & Strategic Thinking
- Book Reading

TECHNICAL SKILLS

MongoDB
Designed scalable schemas using Mongoose with full CRUD operations. Experienced in collection relationships and query optimization.

Express.js
Built RESTful APIs with MVC architecture, implementing middleware for auth and error handling.

React.js
Developed reusable components, managing state via Hooks/Context API and implementing role-based rendering.

Node.js
Created scalable backend servers handling asynchronous operations with async/await.

PROJECTS

Stay Booking (HomyHub)   Live Link
Full-stack platform with user authentication, listing management, and Cloudinary uploads.

Expense Tracker (MERN)
Secure tracker with protected routes and user-specific data storage using backend APIs.

Weather Web Application
Real-time weather app using external API with backend search history.

EXPERIENCE

Future Interns
Worked as a MERN Stack Developer Intern focusing on full-stack application logic.
